

Luminosity - Tuffline Lightbox

Art Series Lightboxes with Printed Acrylic Graphics

The Luminosity Lightbox from our art series is designed with the discerning artist in mind.

This lightbox is made with a discrete black extrusion designed for high-end backlit displays.

It is illuminated with an LED ladder-light system giving even light throughout the whole graphic with no dull areas or hot spots. The lightbox comes with a transformer which can also be dimmable giving you the greatest control of the lighting.

The graphics are printed by a process called Day & Night. Graphics look great whether viewed in the day with the lightbox turned off, or at night with the lightbox turned on.

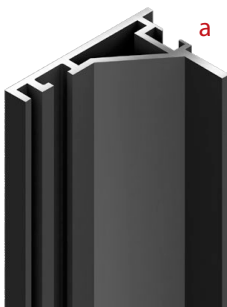

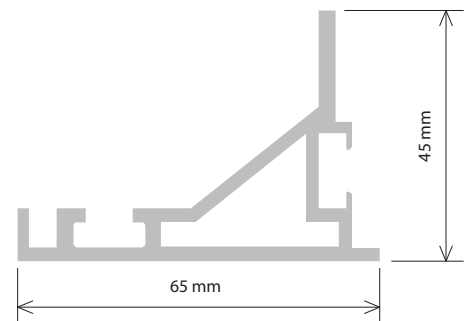

This unique process is onto a clear acrylic on the reverse side to protect the graphic and also to give the art a high gloss finish. You can also replace the acrylic graphic if necessary.

If you want to showcase your artwork with the greatest quality & impact, our Luminosity Lightbox is made just for you.

The Regulatory Compliance Mark (RCM) shows that a product is safe to supply to the Australian market.
